

Elettra Sincrotrone Trieste

Electronic Engineer for the Elettra 2.0 Radio Frequency System

Deadline: 1 September 2024

Ref: GA/24/41

Background

Elettra Sincrotrone Trieste is an international multidisciplinary research center operated as a user facility, featuring a 2.0/2.4 GeV, third-generation synchrotron light source (Elettra), a free-electron laser light source (FERMI) and a variety of support laboratories. The extremely high quality of the machines and beamlines has set new performance records and has been producing results of great scientific and technological interest. In order to allow the laboratory to remain competitive in the next 20 years, an entirely new source - Elettra 2.0 - belonging to the new generation of storage rings (DLSR or Diffraction Limited Storage Ring) is being developed. The new source will exhibit a major increase in the brilliance and coherence fraction of the photon beams. The Elettra 2.0 optics is based on our enhanced symmetric six bend achromat structure (S6BA-E) with a 12-fold symmetry and an emittance of 200 pm-rad at 2.4 GeV. The new structure creates also straight sections in the arcs permitting the installation of additional insertion devices, thus increasing the number of beamlines. Existing beamlines will have to be upgraded and new beamlines developed to take full advantage of the characteristics of Elettra 2.0. The new machine is scheduled for commissioning in the second half of 2026. See <http://www.elettra.eu> for more information.

Job description

The Elettra 2.0 electronic beam is accelerated thanks to a 500 MHz continuous wave radiofrequency (RF) signal in the hundred kilowatt power range that feeds the resonant accelerating structures. The successful candidate will be part of the RF team in charge of designing, developing and commissioning the RF system to accelerate the electronic beam. The system is composed of RF amplifiers, waveguides, RF equipment and instrumentation and includes control electronics and interlocks to safely operate the entire RF system.

In particular, the successful candidate will collaborate with the RF team in the following activities:

- develop, prototype and assemble RF subsystems,
- perform RF test and measurement campaigns,
- commission and set into operation the RF system including commissioning with beam,
- interact with the Elettra 2.0 staff to integrate the RF systems in the accelerator complex,
- draft user guides and manuals for RF system components,
- perform ordinary and extraordinary maintenance.

Qualifications

A Master degree in Electrical Engineering or related field is required together with a minimum of one year of experience in designing and testing electric and RF-microwave systems. A Ph.D. in the same academic field would be considered a plus.

The following technical skills are also required:

- RF or microwave technical expertise relevant to the job description;
- experience in designing printed circuit boards (PCB) using Altium Designer;

Elettra - Sincrotrone Trieste S.C.p.A.

S.S. 14 Km 163,5 in Area Science Park

L. 19 ottobre 1999 n. 370

UNI EN ISO 9001:2015
UNI ISO 45001:2018
UNI CEI EN ISO 50001:2018

Elettra Sincrotrone Trieste

- excellent knowledge of LabVIEW programming language;
- familiarity with RF instrumentation (e.g. network and spectrum analyzers, signal generators).

Basic knowledge of research infrastructures hosting multidisciplinary laboratories and particle accelerators would be considered a plus.

Good oral and written communication skills in English and in Italian language are required.

Good time management skills and ability to prioritize are expected, together with the ability to interact with the facility staff at all levels and to work as part of a multi-disciplinary team.

General information

The deadline for the submission of the application is September 1, 2024.

The appointment will be a fixed term contract with an initial duration of 36 months, subject to a trial period of 3 months, in accordance with the National Metalworkers Collective Labour Agreement and the Company Agreement, ex. art. 8 of the Decree Law 138/2011, dated 28th March 2024.

The salary will be commensurate with the previous experience and qualifications of the candidate.

Applications should include full curriculum vitae, a reference letter and contact information (including electronic mail) of the referee.

The interviews may be held via video conferencing.

Permanent employees of Elettra Sincrotrone Trieste S.C.p.A. and employees or former employees of any Italian Public Entity who have exercised authority over Elettra Sincrotrone Trieste S.C.p.A. or have negotiated with Elettra - Sincrotrone Trieste S.C.p.A. within the last three years will be excluded from the present selection procedure, in accordance with the provisions of article 21 of the Italian legislative decree no. 39/2013 and in conjunction with article 53 (subsection 16ter) of Italian legislative decree no. 165/2001. We thank all applicants in advance.
